of Dental Medicine

Flat-cut, classic toothbrushes. Not only do they clean better and offer that “nostalgic” feel, but those with arthritis are able to better control them compared to modern rounded handles. Available in Soft, X-Soft (for sensitive gums), Medium, Hard, X-Hard. (red/blue/orange/purple)

No crazy “ergonomic” handles

No multi-color bristles

No varying-length bristles

No bent heads

No rubberized handles

No rounded handles

“I have no cartilage in both thumbs and bad arthritis in both hands and therefore I could not use any of the toothbrushes on the market today, as all of them have round handles, which in turn make them impossible to hold in my hands as they keep going around and around, causing me a lot of pain. Now with your flat-handle brushes, there is no pain when I brush my teeth and I thank you so very much for sending them to me”
